

The all-in-one tool for your pv system.

Solar-Planit Software

Web-based and free PV planning software for PV installers and planners

- Comprehensive planning process: building detection, mounting system (novotegra), statics & ballast calculation, planning of electrical components, indicative price offer, yield forecast, profitability calculation, documentation, parts list, webshop connection
- Customised parameters: Cross-manufacturer and country-specific product portfolio, customised database on a module basis, cross-manufacturer compatibility check, customer-specific prices and document branding with individual logo
- Easy ordering: shop connection with customer-specific prices, simple transfer of parts lists, direct purchase, ERP connection

Yield & Profitability

Forecast the profitability of your project

- Individual consumption profiles depending on household and consumption
- Calculate and visualise amortisation

Static & Security

Calculate the statics based on reliable values

- Local wind and snow load zones according to national standards
- Close cooperation on site with novotegra and own test stand on site for reliable values

Documentation & Project database

Generate a project report

- With just one click, you receive your project documented in the required form as a PDF file
- Access previous projects at any time

Fast Business Processing

Seamless project completion and target price offer

- Connection to the BayWa r.e. Solar Distribution Shop
- Create a indicative price offer in advance with customised values (prices, components, etc.)

Individual Support

Receive support from your sales contact

- As a BayWa r.e. customer, you receive exclusive support from our experts
- Simply sharing your planning via click

15 Years of Experience

Software development since 2010

- Benefit from years of experience and close collaboration between software developers and PV experts on site

Made in Germany

Strong infrastructure in the background

- 100% development & server location in Germany

International Accessibility

Intercountry planning

- DE | AT | BeNeLux | CZ | ES | FR | HR | IT | PL | PT | RO | SI | SK (worldwide, if load values known)
- On-site support from local PV experts

100% Free

No licence or subscription fees

- Plan completely free of charge, with no hidden costs

WEITERE FEATURES:
