

Mounting of novotegra PV-system together with CW Lundberg Solar mounting plates and brackets.

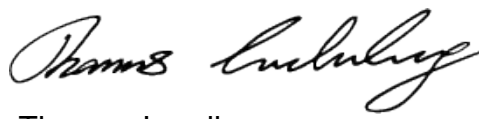

novotegra GmbH and CW Lundberg Industri AB confirm, that novotegra Top-fix system, Flat roof II and Flat roof III mounting systems, can be correctly fixed to insulated roof constructions by means of CW Lundberg mounting plates and brackets.

The combination has been tested, and results show that the products are compatible and the forces that can be applied on the PV- system and mounting system are well within the required range.

Specifications of each component can be found on each company's webpage.

For correct installation of the mounting plates, please refer to the instruction manuals available on www.cwlundberg.com and for novotegra PV-systems www.novotegra.com.
