

Trapezoidal metal roof

+ Insertion system with direct mounting

- Low logistical effort on the construction site
- Few components, completely pre-assembled
- Only one assembly tool required
- Electrical conductivity between mounting system and roof cladding
- Direct fastening with building authority-approved screws
- Pre-assembled with EPDM seal
- Self-sealing in combination with thin sheet screws
- High-quality system appearance and quick installation thanks to the insertion system

Requirements & Features	
Application	Pitched roof
Roof construction	Continuous
Roof pitch	0 – 60°
Roof covering	Trapezoidal metal (aluminium/steel)
Sheet thickness	Aluminium: 0.5 mm Steel: 0.4 mm
Roof mounting	Thin sheet screws
Module orientation	Vertical and horizontal
Module attachment	Insertion system
Module dimensions	Length: no restriction Width: up to 1340 mm
Lightning protection	Yes
Potential equalization	Yes
Corrosion class	C4
Fire behaviour	A1
Warranty	12 years

System Setup	
Roof attachment	 Mounting screws
	 Trapezoidal brackets 
Module attachment	 Insertion system ● black & blank
